

Different users:

Sellers and Shoppers

Sellers permissions: create, read, update, delete and buy products

Shoppers permissions: read and buy products

Create - add_product(request)

Read - view_unique_product(pk, request), view_all_products(request)

Update - edit_product(pk, request)

Delete - delete_product(pk, request)

Buy - add_to_cart(pk, request), checkout(request)

Models:

Product model - with permissions

UI:

Gemini to generate templates

Access:

Registering - reg_user(request) (user chooses between seller or shopper)

Hash their password and encrypt their other data, save hash to db, issue them a cookie or web token?

Different permissions for sellers or shoppers

Each view call will check if they are authorized for it

Failures:

I can have a error template which redirects them back to the home page or login page if they aren't logged in
